Novelty

Introductory Offer

Double flowering

Japanese Quince.

Cydonia japonica flore pleno

A variety that has been under observation and trial by us for a number of years. This is the first time that we have had enough stock to offer. Well adapted to gardens where space is limited or for foreground planting, because of its dwarfer growing habit. The flowers are a bright scarlet red, slightly incurved and the fall flowers are terminal in clusters, while the mass bloom which comes in spring are axillary like the old variety but double.

\$2.50 and \$5.00 each - October delivery

Double flowering Japanese Quince
